SENIOR PRODUCT DESIGNER · SAAS · CRM · ADMIN INTERFACES · B2B · B2C · REMOTE / RELOCATION

Product designer with 9 years building B2B SaaS products: fintech CRMs, admin panels, internal tools. Specializes in design systems and turning messy internal workflows into interfaces people actually want to use.

Experience

Senior Product Designer — 01.tech

Jul 2025 – May 2026

- Designed features end-to-end: discovery, user flows, edge cases, Figma specs, developer handoff
- Built advanced prototypes with microinteractions to communicate motion and state changes clearly to engineers
- Worked from a shared design system, requesting new components as project needs came up
- Proposed and refined project-specific tokens together with the design-system team
- Ran full Scrum ceremonies (sprint planning, daily standups, design reviews) with PMs and engineers
- Took every design through multi-stage sign-off: team lead, tech writers, business analysts, design-system team, keeping cross-functional collaboration tight

Senior Product Designer — Proscm

Jan 2025 – Jul 2025

- Designed product features for an education platform end-to-end: discovery, user flows, edge cases, Figma specs, developer handoff
- Designed interfaces for an investment product: onboarding, dashboards, key user flows and edge cases
- Built advanced, high-fidelity prototypes with microinteractions to validate complex flows before handoff
- Contributed to economics-focused projects handling sensitive, high-stakes data and workflows
- Partnered closely with the lead designer and cross-functional teams to keep design direction consistent across concurrent projects

Senior Product Designer — IREV

Oct 2019 – Jun 2024

- Created a unified design system for internal CRM platforms, replacing one-off styles with a shared component library
- Designed and optimized payment flows and checkout experiences, improving conversion rate across key funnels
- Built interactive prototypes to test user flows and edge cases before development
- Analyzed user behavior across platforms to find friction points and reshape workflows around how people actually worked
- Standardized UI components for consistency across product surfaces, cutting down on rebuilt screens
- Introduced Scrum ceremonies, including sprint planning and reviews, to bring more structure to cross-functional collaboration with PMs and engineers
- Rewrote project documentation, cutting back-and-forth in developer handoff

UX/UI Designer, Product Designer — qmobi

Aug 2017 – Apr 2018

UI Designer — Optionlift

Aug 2016 – Apr 2017

UX/UI Designer — Goodwork

May 2014 – Apr 2015

Graphic / Print Designer — inogroup

Nov 2011 – Feb 2012

Side Projects

Full portfolio: fraimye.com

Product Designer — QuestTick

questtick.com

- Designed and built QuestTick, a live altcoin pump monitor for crypto traders, full product cycle from concept to launch, using AI tools for prototyping and development
- Also built out a trading journal app with alerts, watchlist, and notes

Product Designer — Screela

app.screela.com

- Designed and built Screela, a Chrome extension for flow boards, using AI tools for prototyping and development

Product Designer — Fixlist

fixlist.dev

- Designed and built Fixlist, an analytics tool for landing pages and websites, using AI tools for prototyping and development

Skills & Tools

Design:

UX/UI Design, Design Systems, Prototyping, User Research, Product Analytics, Visual Design, Accessibility (WCAG)

Domains:

Fintech, SaaS/CRM, EdTech, Admin Panels, AI Products, Affiliate Marketing

Process:

Scrum, Design Sprints, Stakeholder Communication, Cross-Functional Collaboration, AI-Assisted Prototyping & Product Development

Soft Skills:

Business Logic Thinking, Systems Thinking, Communication & Storytelling, Problem Solving, Attention to Detail

Analytics:

Yandex Metrica, Umami, PostHog

Tools:

Figma (Variables, Dev Mode, Auto Layout), Sketch, FigmaJam, Miro, Jira, Adobe Suite, OpenCode, Claude Code, Google Gemini, ChatGPT

Front-End Literacy:

HTML/CSS fundamentals, component-based thinking, dev-ready handoff, close collaboration with front-end engineers

Languages:

Russian (fluent), English (B1–B2)
